

Abdul Saleem Mohamed Sabique Sahdoon

Software Engineer | Node.js · React/Next.js · Java/Spring Boot · REST API Integration
Dehiwala, Colombo, Sri Lanka | [+94719292190](tel:+94719292190) | sabiques1@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Professional Summary

Software Engineer with hands-on experience delivering production API integrations and full-stack web applications. At WSO2, engineered the core framework behind the open-source Open Banking Toolkit Template on WSO2 Identity Server, delivered 10+ unit-tested Ballerina connectors for Temenos Transact core-banking REST APIs, and worked with OAuth 2.0 consent flows. Works end-to-end across React/Next.js, Node.js and Spring Boot with MySQL and MongoDB. BSc (Hons) Software Engineering, Second Class Upper.

Technical Skills

Languages:	JavaScript (ES6+), Java, Ballerina, SQL, HTML, CSS3
Backend & APIs:	Node.js, Express.js, Spring Boot, REST APIs, API Integration, OAuth 2.0, OIDC, JWT
Frontend:	React, Next.js, Context API, Responsive Design, Mobile-First Design
Databases & Cloud:	MySQL, MongoDB, Firebase, Firestore, Cloudinary, Vercel
Testing & Tools:	Unit Testing, Postman, Browser Dev Tool Testing, Git, GitHub
Design & SEO:	Figma, UI/UX Design, Wireframing, SEO Best Practices, Performance Optimisation
Database & Cloud:	MySQL, MongoDB, Firebase, Cloudinary
Practices & IDEs:	Agile/Scrum, VS Code, IntelliJ, Cursor

Experience

Independent Learning & Product Development

February 2026 - Present

- Developing WeeklyView, a SaaS product for tracking weekly print progress in startup teams - currently at requirements, data model and UI design stage.
- Studying microservices architecture and deepening Next.js knowledge, working toward distributed service design beyond monolithic full-stack builds.
- Researching workflow automation with n8n, and integrating AI coding tools (Claude Code, Cursor) into day-to-day development work.

Software Engineering Intern, WSO2

August 2025 - February 2026

- Built 10+ Ballerina connectors integrating Temenos Transact core-banking REST APIs, implementing authentication and token handling within each connector and writing the unit test suites covering their operations.
- Engineered the shared core of the open-source WSO2 Open Banking Toolkit Template - the request/response abstractions, base types, schema validation and error handling that region-specific banking toolkits extend - so each new regional toolkit builds on one maintained base instead of duplicating the same implementation.
- Configured and tested OAuth 2.0 consent flows on WSO2 Identity Server within the toolkit's security layer, validating authorisation and consent behaviour across connector integrations.

Software Engineering Trainee, South Eastern University of Sri Lanka (SEUSL) - Oluvil

April 2024 - October 2024

- Volunteered to automate the department's manual letter-preparation process, building a PHP, MySQL and PHPWord system that generates appointment, service and other official letters from templates - delivered and installed on the department's local system.
- Built new page templates and restructured existing pages for the university's public-facing website in PHP, HTML, CSS and JavaScript, implementing responsive breakpoints across mobile, tablet and desktop.
- Reduced page load time through image optimisation, asset minification and deferred script loading, and resolved rendering inconsistencies across Chrome, Firefox and Safari.
- Implemented on-page SEO - meta tags, heading hierarchy, alt text and XML sitemap - to raise the site's ranking for prospective-student search queries.

Education

University of Bedfordshire (SLIIT City Uni)

BSc (Hons) in Software Engineering

September 2024 - September 2025

Second Class Upper Division

National Institute of Business Management (NIBM)

Higher National Diploma in Software Engineering

February 2022 - July 2024

GPA 3.89

National Institute of Business Management (NIBM)

Diploma in Software Engineering

March 2021 - August 2023

GPA 3.95

Projects

CraftedNear | [Figma Design](#)

<https://craftednear.vercel.app/>

- Architected and implemented a full-stack e-commerce web application enabling customers to connect with nearby sellers and allowing sellers to create and manage their own digital storefronts.
- Implemented gamification features (points, badges, titles, leaderboards) to boost customer engagement and seller visibility.
- Built features like customer reviews, exclusive offers, favourite store management, and role-based access, achieving positive feedback from 84% of users who confirmed improved usability, access to local stores, and overall interaction.

Tech Stack: MERN (MongoDB, Express.js, React, Node.js), Cloudinary, JWT, Context API.

Banana Rush (Desktop) | [Medium Article](#)

<https://banana-rush-retro.vercel.app/>

- Built a retro-themed quiz game with sound effects and dynamic gameplay, offering players sign-in through either Asgardeo (OIDC) or Firebase Authentication, with real-time leaderboards and user data stored in Firestore.
- Published a Medium article explaining Asgardeo integration in a React application for streamlined authentication and identity management.

Tech Stack: React, Asgardeo (OIDC), Firebase Authentication, Firestore, Banana Quiz API, Random Number Generator API, Context API.

Craft of Ceylon | [Figma Design](#)

<https://github.com/iamSahdoon/CraftsOfCeylon>

- Designed the UI/UX using Figma and developed key React components, delivering an intuitive and interactive frontend that enhanced user engagement and the overall shopping experience.
- Collaborated with the team to integrate the React frontend with Spring Boot's MVC backend, ensuring a scalable marketplace for local artisans.

Tech Stack: React, Spring Boot, Figma.

Production Process Automation System | [Figma Design](#)

<https://github.com/iamSahdoon/Hameedia-SDD>

- Conducted on-site analysis at Hameedia's manufacturing facility to examine manual production workflows and identify automation opportunities within a live operational environment.
- Collaborated with stakeholders over a one-month period to gather and document system requirements for automating production tracking and process management.
- Proposed an internal automation solution and produced a comprehensive Software Design Document (SDD) including ER diagrams, class diagrams, sequence diagrams, use cases, and UI prototypes using Figma.

Tools and Methods: UML, System Analysis & Design, Figma.
