

Abdul Saleem Mohamed Sabique Sahdoon

75A, Malwatta Road, Dehiwala, Sri Lanka | [+94719292190](tel:+94719292190) | sabiques1@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Professional Summary

Full-stack developer with hands-on experience building and shipping complete web applications from pixel-perfect React and Next.js frontends to robust Node.js and Spring Boot backends. Proven ability to work across the entire product lifecycle, from design thinking and Figma implementation through to database architecture and deployment. Comfortable with both relational and NoSQL databases (MySQL, MongoDB, Firebase) and experienced collaborating in Agile, cross-functional remote teams. Brings a strong design sensibility to technical work, building systems that are not only functional and scalable, but genuinely well-crafted.

Technical Skills

Front-End Core: HTML, CSS3, JavaScript (ES6+), Responsive Design, Mobile-First Design

Frameworks & Libraries: React, Next.js

Design & Prototyping: Figma, UI/UX Design, Wireframing

CMS & SEO: CMS-based workflows, SEO best practices, Performance Optimisation

Version Control: Git, Github

Back-End: Node.js, Express.js, Sprint Boot, Ballerina

Database & Cloud: MySQL, MongoDB, Firebase, Clouinary

Other Tools & Practices: VSCode, IntelliJ, Cursor, Android Studio, Cross-Browser Testing, Agile

Education

National Institute of Business Management (NIBM)

August 2021 – August 2024

Diploma in Software Engineering

GPA 3.95

Higher National Diploma in Software Engineering

GPA 3.89

University of Bedfordshire (SLIIT City Uni)

September 2024 – September 2025

BSc (Hons) in Software Engineering

2nd Class Upper Division

Experience

Software Engineering Intern, WSO2

August 2025 – February 2026

- Contributed to the development of the open-source WSO2 Open Banking Toolkit Template, an accelerator extension for WSO2 Identity Server, by engineering the core functional framework and shared logic used to standardize regional banking toolkits.
- Developed a suite of Ballerina connectors for Temenos Transact (Transactions, Cards, Holdings, etc), enabling standardized integration with core banking APIs and ensuring reliability through comprehensive unit testing.
- Gained exposure to Agile development practices, including design discussions, peer code reviews, and iterative development cycles.
- Actively debugged and resolved integration issues to ensure code quality and architectural alignment, contributing to the delivery of reliable software components while collaborating with cross-functional teams on complex technical challenges.

Software Engineering Trainee, South Eastern University of Sri Lanka (SEUSL) – Oluvil

April 2024 – October 2024

- Developed and optimized responsive, mobile first page layouts and UI/UX for the university's public facing website using HTML, CSS, and JavaScript, improving navigation flow and cross-device consistency.
- Ensured cross-browser compatibility across Chrome, Firefox, and Safari. Applied performance optimization techniques to improve page load speed.
- Collaborated with the development team to implement SEO best practices boosting the university's online visibility for prospective students and staff.

Projects

CraftedNear | [GitHub](#)

<https://figmashort.link/AdchPz>

- Architected and implemented a full-stack e-commerce web application enabling customers to connect with nearby sellers and allowing sellers to create and manage their own digital storefronts.
- Implemented gamification features (points, badges, titles, leaderboards) to boost customer engagement and seller visibility.
- Built features like customer reviews, exclusive offers, favorite store management, and role-based access, achieving positive feedback from 84% of users who confirmed improved usability, access to local stores, and overall interaction.

Tech Stack: MERN (MongoDB, Express.js, React, Node.js), Cloudinary, JWT, Context API.

Banana Rush | [GitHub](#)

<https://banana-rush-retro.vercel.app/>

- Built a retro-themed quiz game with sound effects and dynamic gameplay, integrating Asgardeo and Firebase for secure authentication and real-time leaderboards, with user data stored in Firestore.
- Published a [Medium article](#) explaining Asgardeo integration in a React app for streamlined authentication, demonstrating technical proficiency.

Tech Stack: React, Asgardeo, Firebase, Banana Quiz API, Random Number Generator API, Context API.

Craft of Ceylon | [GitHub](#)

<https://figmashort.link/HSAYjN>

- Designed the UI/UX using Figma and developed key React components, delivering an intuitive and interactive frontend that enhanced user engagement and the overall shopping experience.
- Collaborated with the team to integrate the React frontend with Spring Boot's MVC backend, ensuring a scalable marketplace for local artisans.

Tech Stack: React, Spring Boot, Figma.

Production Process Automation System | [GitHub](#)

<https://figmashort.link/E2CNKy>

- Conducted on-site analysis at Hameedia's manufacturing facility to examine manual production workflows and identify automation opportunities within a live operational environment.
- Collaborated with stakeholders over a one-month period to gather and document system requirements for automating production tracking and process management.
- Proposed an internal automation solution and produced a comprehensive Software Design Document (SDD) including ER diagrams, class diagrams, sequence diagrams, use cases, and UI prototypes using Figma.

Tools and Methods: UML, System Analysis & Design, Figma.

Extra-Curricular Activities and Interests

Member of the Chess Club
Experimenting with LLMs (Claude, Kimi, GLM.. etc.)
UI/UX Design
Photography
ESports

March 2013 – Present
